Abstract (en)

[origin: WO02098686A1] A suspension of a pneumatic type (1), comprising an air spring (6) including a top fixing plate (4), a bottom fixing plate (2), a bellows body (10), of elastically compliant material, extending between the top fixing plate and the bottom fixing plate, a telescopic assembly (8) housed inside the bellows body, and a hydraulic control system (21-23) for controlling extension of the telescopic assembly (8). The hydraulic system includes a tank (23) for an actuator liquid, at least one feed pipe (21) extending between the tank and the telescopic assembly (8), and actuators (22) connected between the tank and the telescopic assembly.
