Abstract (en)

[origin: WO02094662A1] A container for articles, comprising a rear panel (12), a pair of foldably connected front flaps (30) extending laterally inwardly over the rear panel in spaced relation thereto, a foldably connected front panel (34) extending upwardly over the front flaps, and a foldably connected cover panel (38) extending in a closed position downwardly over the front panel. The rear panel, front flaps and front panel define a first compartment for film cartridges, photographs or the like. The front flaps and the front panel define between the overlapped portions thereof a second compartment for negatives or the like. The front panel is releasably connected to the front flaps, and the cover panel can be releasably connected to the front panel when in the closed position or when the container is to be maintained in a collapsed, folded condition for shipping or storage.
