Abstract (en)

Fastening device a sports shoe including a body (102) provided with at least a first side (14) and a second side (27). The fastening device includes at least a first fastening element (103), a second fastening element (104) which can be joined to the first fastening element and includes one or more tensioning devices (101), operatively connected with such first fastening element (103) and/or such second fastening element (104) and with the body (102) of such shoe. The first fastening element (103) is associated to the first side (14) in a sliding way and/or the second fastening element (104) is associated to such second side (27) in a sliding way, respectively. <IMAGE>
