Abstract (en)

The present invention relates to a packaged product comprising flexible liquid-filled pouches and an outer container for containing the liquid-filled pouches: wherein the outer container contains a plurality of flexible liquid-filled pouches whereby at least two or more of the flexible liquid-filled pouches are in mutual contact, and in that the outer container further comprises means for avoiding or minimizing rupture of the flexible liquid-filled pouches when the outer container is subject to shock. Said means can be a wrapping which tightly encloses the plurality of liquid-filled pouches, or a cushioning material.
