Abstract (en)

[origin: EP1396459A1] It consists of the arrangement of the machine in a way such that the existence of the elevator machine room is obviated, being arranged therefore in the elevator shaft, for which purpose a bed (1) has been arranged on which the machine (8) is located, the bed (1) resting on the ends of the guide rails of the counterweight (2) using for this individual fastening plates (3) which are angular in form, being screwed both to the bed and to the counterweight guide rails. The means by which the bed is fastened to the guide rails of the car (4) is by means of some upper arms (5) which project from the ends of the bed (1), using for this some auxiliary pieces (5.1) and some tightening flanges (6), underneath the bed some lower arms (7) are arranged for engaging the car on guide rails. <IMAGE>
