Abstract (en)

[origin: US2004045472A1] In a machine for removing an old track and laying a new track, which comprises a device for receiving old ties, a first conveyor device arranged adjacent thereto for conveying the old ties away from the device for receiving the old ties, and a second conveyor device for conveying new ties to a device for laying new ties, a transfer device having a power-driven, vertically adjustable transfer element for selectively transferring old ties from the first to the second conveyor device is arranged.
