Abstract (en)

[origin: WO02103088A1] The invention relates to a method and device for locally removing coatings from parts, whereby the invention involves the provision of a part (5) having a coating at least in areas and the provision of an absorbent medium, which is supplied with a coating removal liquid. The medium containing coating removal liquid is brought into contact with the area of the part (5) from which the coating is to be removed.
