Abstract (en)
[origin: DE10126818A1] The evaporator has a coolant channel (4) fed between two side walls (2,3). At least one of the side walls is made of a flexurally weak material. This side wall (3) is made from a plastic foil. The coolant channel is made from a pipeline and the evaporator contains a heat transfer fluid in thermal contact with the pipeline. AN Independent claim is also included for the following: a refrigerator.
