Abstract (en)

[origin: WO03001484A2] A display unit for displaying interlaced images upon an image-carrying medium, the display unit having a frame with a front lenticular lens wall and a motor coupled to a medium displacing means for imparting reciprocal vertical movement to the image-carrying medium within the frame and behind the front lens wall. The medium displacing means may include a pinion gear, a guided ring gear and a frame.
