Abstract (en)
[origin: WO03001403A1] A method and apparatus for creating a cross-idea association database. The cross- idea database correlates words and phrases in one language, corresponding to information in one state, to words and phrases in a second language, corresponding to information in a second state. The method includes receiving content expressed in a first state and receiving content expressed in a second state, analyzing the content expressed in said first state with said content expressed in said second state. Analyzing involves utilizing segments of content expressed in a first state and segments of content expressed in said second state. The method also includes creating an association database of the content in said first state as related to said content in said second state.
