Abstract (en)

[origin: EP1398434A2] The door handle arrangement has a handle with a closure cap (11) and at least one component (6), e.g. an antenna, arranged inside the handle. The component together with the closure cap and a guide element (12) forms a separate unit (6,11,12) inserted into the handle. The closure cap and the guide element are each arranged at the ends of the component.
