Abstract (en)

[origin: EP1398563A1] The feeding and positioning module (10) comprises a box (12) forming support for an electro-luminescent diode (14), and an electrical feed connector (24). The connector takes the form and dimensions of the body of the incandescent lamp, the box and the connector being of a single piece, and the electro-luminescent diode is mounted on a printed circuit (16). The box includes abutments (22) for positioning the printed circuit carrying the electro-luminescent diode.
