Abstract (en)

[origin: EP1398574A2] Production of a domestic appliance door (8) for closing a working chamber, especially an oven door for closing a cooking chamber (4), comprises providing at least one inspection window on at least one side with at least one first coating, and/or on one and/or both sides and/or inside between the two sides with a marking. Independent claims are also included for the following: (1) Domestic appliance door especially manufactured by the above process; and (2) Working chamber, especially an oven chamber, comprising at least one oven door, especially manufactured by the above process. Preferred Features: The first coating is easy to clean and is applied to the working chamber-side (12') of the inspection window (12) facing the working chamber. A second heat-reflecting coating is applied to the side (12'') of the inspection window lying opposite to the side with the first coating.
