Abstract (en)
[origin: WO02100194A1] The invention relates to an aromatized gas that is provided as a compressed, pressure-liquefied or cold-liquefied gas in a pressurized container or insulating container. The aroma-containing gas, including aerosol or spray, is used to dose an aroma or flavor (scented or flavored preparations), for example in the production of food and drinks and for aromatizing packaged food where the aromatized gas is used like a protective gas.
