Abstract (en)

[origin: US2003173393A1] The invention relates to an expulsion device (10) for expelling objects (58) or liquid materials from a reservoir (15) by means of a drive piston (20) which is subjected to the action of the pressure medium, comprising a pressure medium container (14) which is exchangeable and connected to a device body (11), enabling the pressure medium to act on the drive piston (20) which is thus displaced in a forwards and backwards direction.
