Abstract (en)

[origin: EP1400674A2] A control device reads data from a data carrier for control purposes. An actuator associated with the data carrier includes characterizing data. Data can be written from the control device into the data carrier. Data written relate to a zero-volume calibration or volume equalization regulation. The actuator is preferably an injector for injecting fuel into the engine. An Independent claim is included for an apparatus for controlling an internal combustion engine.
