Abstract (en)
An integrated pressure reducing valve comprises an inlet port (1) for connecting to the outlet of a gas container and an outlet port (2) for connecting to a consumer. It further comprises an upstream pressure regulator (3) and a downstream pressure regulator (4) connected in series between the inlet connector (1) and the outlet connector (2), with the upstream pressure regulator (3) arranged upstream of the downstream pressure regulator (4). An auxiliary port (5) is provided at a point of connection (6) between the upstream pressure regulator (3) and the downstream pressure regulator (4). <IMAGE>
