Abstract (en)  
[origin: EP1400997A2] The push button (14) actuated electrical switch (12) is connected to an electrical load. Also mounted on the under side is a magnetic armature (18) that moves in a coil (16). Both are mounted on a plate (10). A feed back circuit (20) generates pulses when the switch is properly actuated and these are fed to the input as tactile feedback. An alternative uses a piezo electric device for feedback.
