Abstract (en)

[origin: WO03004272A1] A printing machine with several sections (01, 02) comprises at least one printing unit (03, 04) with at least one web (06, 07) running therethrough per section. Two sections are arranged at an offset to each other, transverse to the longitudinal direction of the printing machine and production is achieved, at least partly, using a common folding unit (11), extending over a total width.
