Abstract (en)

[origin: WO02094599A1] The invention relates to a vehicle door (1), comprising an inner wall (2) and an outer wall (3), which are firmly connected to each other, at least in parts. The door also comprises a door function module (4), fixed in the region between the inner wall and the outer wall, with at least one outlet (7) in the inner wall. Said door function module (4) bears directly or indirectly in an at least partial manner upon the inner side of the inner wall of the door(2). The invention also relates to a method used to produce said vehicle door.
