Abstract (en)
[origin: WO03004306A1] The invention relates to a fitting for a vehicle seat, in particular for a motor vehicle seat. Said fitting comprises two fitting parts (5, 8), which can be pivoted in relation to one another and by means of which a backrest (12) of the vehicle seat (3) can be tilted between a sitting position and a horizontal position and/or a reclining position. The fitting also comprises a catch (15) that is pivotally mounted on a first fitting part (5), said catch interacting with at least one individual locking element (18, 32) of the second fitting part (8) to lock the fitting (1). Said catch (15) locks the fitting (1) both in the sitting position and in the horizontal or reclining position.
