Abstract (en)

[origin: WO02094908A1] The invention relates to a method for the removal of low molecular weight components from polyamide 6, or from co-polyamides based on caprolactam, by means of extraction. The invention further relates to a device for the removal of low molecular weight components from polyamide 6, or from co-polyamides based on caprolactam, by means of extraction. The invention further relates to a method for the production of polyamide 6 or of co-polyamides based on caprolactam and a device for carrying out said method.
