Abstract (en)
[origin: WO02092684A1] Stabilised thermoplastic moulded masses, comprising (A) at least one polyolefin A), produced by application of at least one metallocene catalyst and (B) at least one stabiliser B), selected from the following groups b1) bis b4): (b1) sterically hindered amines based on glycolurils, (b2) sterically hindered amines based on 4-formylaminopiperidines, (b3) sterically hindered amines based on maleic acid imide/ alpha - olefin copolymers and (b4) sterically hindered amines selected from particular individual compounds.
