Abstract (en)

[origin: WO02103732A1] The invention relates to a low-current starter switch (1) for vehicles, comprising a rotor (3; 3') fixed to the anti-theft cylinder with regard to rotation and an electrical circuit. According to the invention, said electrical circuit is low current and with a variable resistance, depending on the angular position of the rotor (3; 3'), and provides an output voltage (Vx) which varies as a function of said resistance.
