Abstract (en)
[origin: WO03005491A1] The aim of the invention is to provide a terminal (1) comprising a first clamping element (2), a pressure part (4), a terminal screw (5) and a clamping frame (6), which has a first receiving area (7) for at least one conductor and in which a clamping piece (8) is located, with an additional connection option. To achieve this, the clamping piece (8) has a second receiving area (9) for at least one additional conductor, thus forming a second clamping element (3).
