Abstract (en)

The part (1) has a plate-like body (2) with a set of receptacles (3). The receptacles has a front stop surface (19) that interacts with front abutment surface (20) formed in pistons (4) to stop the piston stroke. A wall (13) on side of the body acts on a material that is to be pressed. A circuit (C) with a fluid medium is associated with the receptacles to actuate respective pistons.
