Abstract (en)

The locking device comprises a body (2) which can be introduced between a trigger guard (14) of a nozzle (11) and its trigger (12) in the fuel dispensing position. It can then be temporarily wedged between the trigger and the trigger guard so as to hold the trigger in its dispensing position. An Independent claim is included for a method of dispensing fuel using the trigger locking device.

Abstract (fr)

Ce dispositif de blocage comporte un corps (2) qui est apte à être introduit entre un pontet (14) d'un pistolet (11) et sa détente (12) en position de distribution de carburant, puis à être coincé temporairement entre le pontet (14) et la détente (12), de manière à maintenir la détente (12) dans la position de distribution de carburant. <IMAGE>
