Abstract (en)

[origin: EP1403446A2] The safety device includes a support device fastened to the support structure of the roof and projecting upwards from the roof. The safety device has a suspension for safety rope (84) equipped with a spring snap (80). A rod-form component (26), which is especially screwed to the support structure (90), is fastened to one end of a tube (12), to the other end of which is attached a head piece (50) which has an eye for the attachment of the spring snap on the safety rope.
