Abstract (en)
[origin: EP1403890A1] The switch (2) has a switch housing (4) and an operating drive (6) coupled to a sliding contact carrier (20) within the housing via an operating rod (8) projecting through a housing opening, the contact carrier fitted with contact bridges (44,46), for cooperation with fixed contacts (66,68), incorporated in a terminal block (54,56). The front face (76) of each terminal block is angled in the direction of a front insertion opening (22) for the connection leads, relative to the assembly opening (24) of the housing which is fitted with a removable cover (26).
