Abstract (en)

[origin: EP1403893A1] The fuse insert (1) has a housing (2) containing a working fuse conductor (10) and a display device with a display element (20) held in position by a display fuse conductor (11), parallel to the working fuse conductor within the housing, engaging an end section (22,23,24) of the display element provided by a Z-shaped spring with its parallel arms parallel to the cover plate (4) of the housing. A stop (27) limits the movement of the display element upon release of the fuse.
