Abstract (en)

[origin: EP1403966A1] A shielded connection arrangement (10) comprises a housing (2) with a securable cover (21, 102) and insulation displacement contacts for making contact with wire conductors of electrical wire(s) (14). The housing and the cover are insulating. An electrically conductive shield plate is provided for shielding the interior of the insulating housing in a closed arrangement. An independent claim is also included for a conductive housing of an electrical device or device module comprising shielded connection arrangements arranged next to one another.
