Abstract (en)
[origin: US2005246838A1] A protective cover for a comforter has a bottom face and a top face which form a flexible woven fabric envelope. The cover is formed from a single-piece envelope including an edge which is at least partly closed in a permanent manner and three edges having fast opening and closing devices allowing the two faces of the envelope to be partly separated in order for the comforter to be placed on one of the faces of the envelope, so that the comforter is covered by the other face and at least two edges of the faces are joined with the aid of the fast opening and closing devices.
