Abstract (en)
[origin: GB2377379A] A fire-resistant barrier for roof spaces comprises a fire curtain impregnated or coated with a quantity of an intumescent material. An intumescent-containing adhesive is provided to adhere the fire curtain to one or more roof trusses or party walls of the roof space. A plurality of battens coated with or produced from an intumescent material are provided to secure the fire curtain to roof trusses or party walls of the roof space, and pieces of fire retardant intumescent impregnated flexible foam or sponge, rockwool, ceramic felt or compressed glass wool are provided to fill all gaps present between the fire curtain and the surrounding roof structure to seal the adjoining roof spaces one from the other.
