Abstract (en)

[origin: WO03000368A1] The invention relates to a gaming management method carried out between a gaming management center (10) and at least one remote gaming terminal (20i), comprising a step (40) in which a gaming ticket is requested from a gaming terminal (20i), and a stage (58, 60) in which the gaming ticket is presented by the gaming terminal. The inventive method also comprises a step (50) in which a winning indicator (R1) determining if the gaming ticket thus presented is a winning ticket or a losing ticket is generated by the gaming management center (10), said stage occurring before the presentation stage, and a step (52) in which a result (R) containing said winning indicator is transmitted by the gaming management center (10) to the gaming terminal (201, , 20n). During the presentation step (58,60), the gaming terminal generates at least one representation of the ticket according to the result (R) thus transmitted, whereby said gaming ticket is presented in said representation.
