Abstract (en)  
[origin: WO03000824A1] The present invention is directed to a composition which can be molded into a coupling to produce a fire stop. The composition comprises 100 parts by weight of a PVC resin and 20 to 100 parts by weight of an intrumescent material, preferably exfoliated graphite. The composition may optionally contain other typical components utilized in molding operations for PVC resins such as lubricants, foaming agents, plasticizers modifiers and processing aids
