Abstract (en)

[origin: WO03006872A1] The heating and/or sanitation pipe comprises an inner pipe (12) made of a plastic material and a corrugated metal pipe (14) surrounding the inner pipe at a radial distance (r) therefrom. The heating and/or sanitation pipe is also provided with a compressible and/or expanded material between the inner pipe (12) and the corrugated pipe (14) in order to fix the inner pipe (12) inside the corrugated pipe (14). The compressible and/or expanded material (16) can be detached therefrom in order to reveal a connecting end of the inner pipe (12). The heating and/or sanitation pipe also comprises an insulating layer surrounding the corrugated metal pipe (14) and an outer covering (20) surrounding the insulating layer (18).
