Abstract (en)
The board (1), made with reinforced surfaces with a core (22) between them, has the core in the form of a matrix (30) made from a filling material such as a plastic foam with a cavity (32) containing an insert (31). The insert has at least one mechanical property that is greater than that of the matrix, such as resistance to traction, compression or flexure, or limit of elasticity. It is made from wood, either solid, laminated or ply, or a fibre-reinforced plastic, elongated in shape and positioned lengthwise between the board's lateral edges; it can extend between front and rear end reinforcements.

Abstract (fr)
Planche de glisse ou de roulage (1) comprenant, en hauteur, un premier renfort (21), un deuxième renfort (23), et un noyau (22) situé entre les renforts(21, 23). Le noyau (22) comprend une matrice (30) faite d'un matériau de remplissage, au moins un insert (31) étant logé dans la matrice (30), l'insert (31) présentant au moins une propriété mécanique supérieure à celle de la matrice (30), cette propriété pouvant être la résistance à la traction ou autre. <IMAGE>
