Abstract (en)
The device has a lower part (8) coupled to a rotary upper part (6). A toric cylinder (1) with one direction entry valve (2) is fixed within the part (6). A curved piston (9) joined with the part (8) of the device cooperates with the cylinder. The entry valve placed at an end of the cylinder is opposite to an entry end of the cylinder for the piston and an outlet valve at the connection between the cylinder and a pipe (15).
