Abstract (en)  
The product has reconstituted walling material formed as a block. One end of the block is adapted for mutual engagement with corresponding end of another such block. The end provides horizontal and vertical mating surfaces. The ends of the blocks are formed as tongues (17, 18) formed with through-holes for receipt of a dowel, bar or pin to retain the blocks in registration. Independent claims are also included for the following: (a) a kit of parts for assembly of a wall (b) a wall.
