Abstract (en)
Construction of a lamp holder (socket) -bayonet type- for internal and external lighting. The lamp holder comprises a main body (1a), spikes (5), a waterproof flange (6), a one-way bolt (7) and drivers (9) on the cover (4).
The holder (1) has spikes passing from an upper to a lower part of a socket or vice versa on a main body. A waterproof flange integrates the socket with a system and a waterproof ring after locking the ring in the holder. Contact spikes and verge are located on bases of an internal part of the body. The holder is placed on a cable (2) and is screwed by one way bolts.
