Abstract (en)
[origin: WO03005862A2] A shelf management system comprises a product merchandising apparatus (400) for mounting on a shelf, rack or other support unit (405). It comprises a locating strip (430) engageable with the front edge (406) of the shelf. One or more dividers (410) divide the shelf into zones to accommodate product. The front end of each divider (410) is engageable with and lockable to the locating strip (430). In the engaged mode, the divider (410) is movable relative to the locating strip (430) while still being connected to the locating strip. In the locked mode the divider (410) is secured relative to the locating strip (430).
