Abstract (en)
[origin: WO03007764A8] The invention concerns a box for storing objects, comprising a fixed part (2) and a mobile part (3) mounted mobile relative to the fixed part between an open position providing access inside the box and a closed position wherein said mobile part (3) is fixed, by closure means, relative to the fixed part (2) inhibiting access inside the box. The closure means are adapted to enable the mobile part (3) to take up a half-open position and the mobile part (3) comprises a portion (36) made from a transparent material to enable, when the mobile part (3) is half-open, display of the inside of the box but without access inside the box.
