Abstract (en)

[origin: WO03006260A1] The invention concerns a tool (1) for producing decorative patterns (5) on a coating material (3). Said tool is characterised in that it comprises a matrix formed or fixed on a stretched endless strip (2) freely rotating and comprising at least a planar part forming a support surface. According to the invention, the endless strip (2) is stretched between at least two freely rotating rollers (6, 7).
