Abstract (en)

[origin: DE10134085C1] The load space cover (1) has a sliding cover element (2), displaced along at least one linear guide (3,4) under control of at least one electric motor (6), mounted on the sliding cover element. The electric motor may be positioned centrally for rotation of a transverse shaft (5) at the edge of the sliding cover element, provided with end cogs (9) cooperating with a pair of toothed linear guides.
