Abstract (en)

[origin: WO03000656A2] Antisense compounds, compositions and methods are provided for modulating the expression of Transforming growth factor beta receptor II. The compositions comprise antisense compounds, particularly antisense oligonucleotides, targeted to nucleic acids encoding Transforming growth factor beta receptor II. Methods of using these compounds for modulation of Transforming growth factor beta receptor II expression and for treatment of diseases associated with expression of Transforming growth factor beta receptor II are provided.
