Abstract (en)
[origin: WO03009455A2] The invention relates to a switch converter with a primary winding of a transformer (UET) in series with a switch console (T, S), comprising a self-conducting semiconductor switch (S) and an auxiliary semiconductor switch (T). The longitudinal voltage (U>SD<) of the auxiliary switch is supplied to a control circuit (AST) as operating voltage (U>B<) at least at the start and the output thereof is applied to control elements of the auxiliary switch.
