Abstract (en)  
[origin: EP1407998A1] The escalator or moving pavement has a cleaning device (10) which is engaged at least partially during the transporting and maintenance operation of the escalator or moving pavement, and has a control element through which a brush bearing (14) is movable. The control element is connected to the brush bearing by a lever (16) or other gear. The control element bears against the top surface of the tread area (48) to be cleaned and especially with spring-loading. An Independent claim is included for a cleaning device for the cleaning of an escalator or moving pavement and equipped with revolving brushes which rotate during the transporting operation of the escalator or moving pavement.
