Abstract (en)
[origin: WO03011728A1] The invention relates to a method for controlling a storage roller (10) for storing sheet-type objects (34), in particular bank notes, between the wound layers of a belt-type film (36), the latter being wound and unwound between a film drum (12), which is driven by a first motor (16) and comprises a film reservoir roll, and a winding drum (14), which is driven by a second motor (18) and stores the sheet-type objects. According to the invention, the tension of the film is adjusted to a predetermined set value.
