Abstract (en)
[origin: WO03002664A1] The invention relates to flame-resistant, preferably halogen-free, thermoplastic moulding materials, comprising one or several polyesters, a combination of flame-proofing agents consisting of a compound containing phosphorous, a compound containing nitrogen, and a polyolefin compound which is used on its own or together with zinc sulphide. The invention also relates to the use of said moulding materials in the production of moulded bodies, films or fibres, in addition to said moulded bodies, films or fibres.
