Abstract (en)
[origin: WO0243414A2] A multimedia messaging method comprising the steps of: receiving a content from a sender and addressed to one or more recipient; accessing a database comprising recipient data describing multimedia reception capabilities and / or reception preferences for at least one recipient; forming, in accordance with said recipient data, a notification message containing information that said media content is available to be streamed to the addressed recipient(s); and transmitting the notification message to the addressed recipient(s). A corresponding network entity, communication system and computer program are also described.
